JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

Laguna de Terminos reports 1 new case for the week ended July 4. The exact date was not given, but the case occurred after June 29, and is a new case not previously reported, making a total of 9 cases, including the 2 reported in my letter of June 27.

Quarantine regulations previously reported continue against Laguna. Heavy rains continue daily. Mosquitoes increasing.

*Yellow fever at Veracruz.*

Doctor Jacobs further reports:

July 14. Another case of yellow fever has occurred in Veracruz. The history of the case is as follows:

J. C., Mexican, 20 years old, native of Zacualtipam, State of Hidalgo, twenty days' residence in Veracruz.

Taken sick July 10 and sent to isolation hospital. Diagnosis of yellow fever was made to-day and confirmed by national board of health. To-day's case is only one block removed from locality where the former fatal case occurred. The patient had not been out of the city since arrival.

July 17. Yellow fever case confirmed by the superior board of health July 16.

The history of the case is as follows:

Male, Spaniard, 28 years old, office assistant in commercial house, five months' residence in Veracruz. Has not left city since arrival. Taken sick evening of July 12.

The man worked in the office of a wholesale grocery house, about six blocks from where the original case occurred, and lives in the same building. The house has been fumigated and the patient screened.

This makes 3 cases and 1 death to date.

None of the cases have been traced to outside infection. The patients had all been employed at indoor work.

The second case occurred about one block from the first case.

PANAMA.

*Report from Bocas del Toro, fruit port.*

Acting Assistant Surgeon Osterhout reports:

Week ended July 14. General sanitary condition of this port and the surrounding country during the week, good. Present officially estimated population, 4,954.
